Note:

*) For the calculation of the equivalence totals, the respective acid forms (CBDA, CBGA & THCA) were multiplied by the factor 0.877 in order to deduce the equivalent amount of the neutral form.

Analysis method: HPLC-DAD (High Performance Liquid Chromatography - Diode Array Detector). The results described in this report only apply to the samples analyzed. Mass% of -- is to be concluded as "not detected" = <LOD "Limit of Detection". All measurement methods were calibrated and checked with certified reference materials.
